Winter 2024

## Product Updates

Dear readers,  
 at the beginning of this new year, we would like to express our most sincere gratitude for having been part of our 2023. Your trust and collaboration have been fundamental to our growth, and we hope to continue to increase the value we bring to your projects this year.

Here, we present you the latest news from BrixWire News Hub, divided into 2 sections:

- ▶ Current status
- ▶ Spotlight Server

## CURRENT STATUS

### Release Notes

Since the previous quarter, there has been the option to find the front-end and back-end news in our blog. You can find the release notes under the menu BrixWire - Release Notes. The latest release brings with it two new features: the RSS Output plugin and the private output channels.

### Quick export to an email address

Sharing news stories is now as easy as a single click. With the new email export functionality, users can instantly transfer content from the BrixWire News Hub's news browser to their preferred email addresses.

## Artificial Intelligence Integration

It is now possible to use artificial intelligence as an editorial assistant with 4 different functionalities:

- ▶ Reducing Article Length
- ▶ Translation of articles into any desired language via ChatGPT
- ▶ Extraction of metadata from an article.
- ▶ Speech2Text: allows you to convert video or audio content into text.

## Monitoring with Grafana and Prometheus

We are pleased to announce an important addition to BrixWire News Hub: our real-time monitoring system! We understand the importance of staying on top of the health and performance of your operations. That's why we've integrated the Prometheus and Grafana platforms into our ecosystem, giving you the ability to have oversight over your installation.

## BRIXWIRE SPOTLIGHT SERVER

## Spotlight Server

Are topic servers based on BrixWire that give publishers access to information about a country or specific topics. The servers contain content from sources such as the press, governments, bloggers and feeds such as RSS and Telegram.

In addition, there is a complete technological offering that provides numerous filtering and sorting options. As well as translation and AI functionalities.
